4-ch Reel Power Battery Charger
Instructions

Mains Input

Suitable for worldwide use (100~240 VAC 50~60Hz). This product is class 1 and must be earthed. These chargers are CE marked and have been designed to comply with all relevant safety/EMC regulations.

Do not cover Vents!

Battery Charging

The RP-4X4 is a four-channel simultaneous fast charger which has been specifically designed to charge Hawk-Woods Reel Power 26v range of batteries. All four channels work independently of each other; enabling to charge up to four batteries at one given time it takes to charge one.

Charger Use

A **RED** illuminated light will indicate that the charge is connected to the mains and ready to power a battery, which when connected will illuminate a **YELLOW** LED; if the battery is below 80% charge.

At **80%** charge and above the **YELLOW** status LED will flash **YELLOW & GREEN**.

At **100%** charge the LED will keep a consistent **GREEN** light to indicate that the battery is ready for use.

Charging Status Indication Sequence

 **Ready**

 **Power**

 **80% Charged**
