Q5 Color
LED Fresnel

(P/N: FLXQ5CLR)

Description

The Q5 Color is a 185W 5" LED Fresnel that generates high-quality RGBW light output. This fixture uses the latest iteration of Fiilex's Dense Matrix LED technology to deliver color quality and optical versatility that are superior to previous generations of LED fresnels. With its wide spot/flood range, smooth dimming to 0%, no flicker, and high CRI, the Q5 Color combines the extensive feature set of top-tier RGBW LEDs with the performance of a tungsten fresnel.

The Q5 light head weighs only 7 lbs, and its innovative V-mount power system means that the fixture's power supply can be easily swapped out with compatible V-mount batteries. Light settings can be adjusted on the Q5's back panel via the directional pad or the intuitive control knobs. The directional pad can also access the Q5's different fan and dimming modes, as well as the various control modes, which include CCT, HSI, Gels, and Effects in both 8-bit and 16-bit versions.
